

AccuMaster – Digital Angle Finder Ruler

The AccuMASTER™ Digital Angle Finder Ruler is a compact protractor that measures the full range of precise inside and outside angles from 0-360° to the 10th of a degree.

To measure in awkward spots, the Angle Finder incorporates a locking knob to hold the "arms" in place as well as a "Hold" button for the display to capture the new angle measurement until the user is able to read the display.

When measuring the angle change from one work surface to another, the Angle Finder can manually zero at any angle for relative measuring and it has a locking screw to hold measurements and prevent accidental changes.

Ideal for finish carpenters, tile setters, countertop installers, carpenters, paver installers, sheet rockers, crafters, DIYs, anyone who needs precise inside and outside angles.

Functions:

- 360° full-range protractor
- Inside Angles & Outside Angles
- Large easy-to-read LCD display
- Display "hold" button
- Manually zero at any angle

Specifications:

- Accuracy +/-0.3°
