

Scale Master Pro XE

With Optional PC cable

The Scale Master Pro XE Advanced Digital Plan Measure for Blueprint Takeoffs makes it easy to do linear, area and volume takeoffs with speed, accuracy and confidence when estimating, bidding or planning.

You can also connect it to your PC with an optional interface cable and transfer rolled values directly into commonly used spreadsheets or estimating programs, saving time and reducing the potential for costly transcribing errors.

91 built-in scales - 50 U.S. (feet-inch) and 41 metric - help you measure plans, blueprints, and maps for maximum versatility in architectural, engineering and civil/map scaling. Save up to 10 custom scales for calibrating out-of-scale plans and plan books. You can easily store a new scale permanently into the device for future use.

The PC Interface cable (sold separately) lets you transfer rolled values from the Scale Master Pro XE directly into commonly used spreadsheets or estimating programs, saving countless keystrokes, saving time and reducing the potential for costly transcribing errors.

Specifications:

- Units: decimal feet, feet-inches, decimal yards-feet- inches, miles, nautical miles, acres, millimeters, meters, kilometers, and hectares - most available in square and cubic formats.
- Dedicated length, width and height keys: roll, store and recall LxWxH values and instantly find rectangular areas and volumes.
- Auto count feature: automatically counts how many times a pre-set distance has been rolled.
- Size: 186 x 47 x 15 mm, Product Weight (product only with battery): 60 g
- Two 3-volt lithium (CR-2032) batteries (included)
- Display Type: LCD segment; 7 digit main display, 3 digit count, 5 digit scale display
- Accuracy: Mechanical accuracy 99.8%. Users should allow for 2-4% variance for start/stop points and rolling surfaces.
- Wheel Resolution: 0.635mm
